Calibrate SS

★ For quick ISO setting, see page 4.

If the shutter speed reading on the light meter does not match the shutter speed on your camera, you can calibrate it through the setting menu (RESET ▸ CALIBRATE SS)

CALIBRATE SS
SHUTTER: 1/2

CONFIRM CALIBRATE
SHUTTER: 1/2
Yes
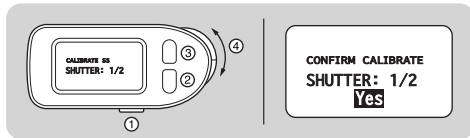

Press ③ or ② to select the shutter speed on the M-Meter.

Turn ④ to match the shutter speed on the camera.

Press ① to confirm.

- Apply the same process to the other shutter speeds.

- To save the settings, go to the last page (after 1/1000) and press ① to confirm.

⑤ Aperture. "--" appears when exposure is out of range.

⑥ Shutter Speed

How to Install

Set the camera's shutter speed dial and the M-Meter's dial to "**B**".
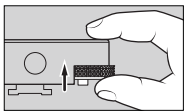

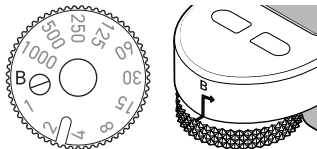

Lift the shutter speed dial and, while holding it up, attach it to the camera's shoe mount. Make sure the ridges on the M-Meter fit into the slots on the camera.
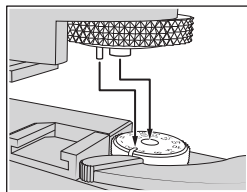

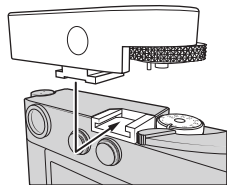

Settings

- **Hold** ① and ② to **open Settings**.
- **Press** ① to **confirm**.
- **Turn** ④ to **go back**.

★ Set ISO from the home screen:
  - Press ③ to increase the ISO.
  - Press ② to decrease the ISO.

Compensation

Range: -3 to +3 (1/3)

ISO **200**
EV **7.58**
2.8ᶠ
1/60

Press ③ to increase the value.
Press ② to decrease the value.
Press ① to confirm the value.
Turn ④ to return HOME.

When exposure compensation is set, "**±**" appears on the home screen.
